Abstract (en)
[origin: EP0622425A1] The present invention relates to novel magnetisable lustre pigments comprising plateletlike, nonferromagnetic, metallic substrates coated with A) a first, ferromagnetic layer comprising iron, cobalt and/or nickel, and if desired B1) a further layer, this time comprising a metal oxide, and/or B2) an outer, passivating, phosphate-, chromate- and/or vanadate-containing layer, mixtures thereof with coated silicatic platelets, and the preparation and use of the pigments.
