Abstract (en)
[origin: FR2695823A1] Improved dental implant system for fitting into the jaws. The implant system is characterized in that the implant-peg assembly is formed by multiple indexing, the implant including an xn-sided female portion and the peg an n-sided male portion. According to a second embodiment of the invention, the implant comprises an n-sided male portion and the peg an xn-sided female portion.

Abstract (fr)
La présente invention a pour objet le perfectionnement d'un système d'implants dentaires destinés à être fixés dans les maxillaires. L'assemblage implant-moignon se fait par indexage multiple, l'implant (2) comportant un xn pans femelle et le moignon (8) un n pans mâle. Selon un deuxième mode de réalisation de l'invention, l'implant comporte le n pans mâle et le moignon le xn pans femelle.
