Abstract (en)
[origin: WO9314018A1] An attachment for a fork lift truck is disclosed for picking up slab-shaped components (35). The slab-shaped components (35) are picked up by a pick-up device on the attachment, secured by a supporting arm (10) and a guide rod (12) to a frame. The frame can be held by the fork (1) of the fork lift. By swivelling the supporting arm (10) through 90 DEG , the pick-up device rotates trough 180 DEG , guided by the guide rod (12). The supporting arm is swivelled by a hydraulic lifting cylinder.
