Abstract (en)

[origin: EP0623521A1] A protective transparent holder (10), consisting of two tubular parts (10.1, 10.2) which are closed at their one end in each case apart from ventilation openings (12) and which are designed to be pushed one inside the other in the region of their other and open ends to close the protective holder (10), at least one of the two parts (10.1) of the protective holder (10) being made from an elastically deformable plastic material and being provided, in its overlap region (13) with the other protective-holder part (10.2), with at least one catch projection (14) or one catch opening for a catch projection of the other holder part (10.2). <IMAGE>
