

Title (en)

Stressed steel reinforcement for prestressed concrete sleepers with grouted anchoring.

Title (de)

Spannstahlbewehrung in Spannbetonschwellen mit Vorspannung mit nachträglichem Verbund.

Title (fr)

Armature tendue en acier pour traverses en béton précontraint avec ancrage injecté.

Abstract (en)

In order to avoid permanent cracks in the case of prestressed-concrete sleepers with post-tensioning which are subjected to high loading, it is proposed to use as stressing reinforcement, in place of the hitherto-used smooth hairpin-shaped stressing bars, those of profiled cold-drawn steel.

Abstract (de)

Um bei hochbeanspruchten Spannbetonschwellen mit nachträglichem Verbund die Bildung von bleibenden Rissen zu vermeiden wird vorgeschlagen, als Spannbewehrung anstelle der bisher verwendeten glatten haarnadelförmigen Spannstäbe solche aus profiliertem kaltgezogenen Stahl zu verwenden. <IMAGE>
