Abstract (en)
[origin: EP0624704A1] Vibration-free double glazing mounted in a frame, of the type including at least two panes 1, 2 separated by a space 3, characterised in that at least part 16 of one wall delimiting this space 3 can move and is connected to driving means 10 to 15 controlled by an automatic-control system receiving at its input a signal representing the pressure in the said space 3 or the displacements of one of the said panes 1, 2, the said automatic-control system being arranged to control the displacements of the said movable part 16 so that they tend to keep the pressure in the said space 3 constant. Application to railway carriages. <IMAGE>
