Abstract (en)

[origin: WO9315982A1] A side loading refuse vehicle (10) having a wheel assembly (11) supporting a cab (12) and a chassis (13), a storage tank (14) having two tank sections (15 and 16) is mounted on the chassis (13). A hopper (17) having a loading aperture (18) is located behind the cab (12), the hopper is adapted to receive refuse from a loading mechanism (19) adjacent the hopper so that the contents of a multi-compartment bin (20), which in this case includes a central divider partition (21) shown in phantom in Figure 1, can be partially inverted over the hopper (17) so that the contents of the bin (20) are diverted into the respective tank sections (15 and 16) by the refuse transfer mechanism in the hopper (17).
