Abstract (en)

[origin: EP0626555A1] The technical field of the present invention is that of practice munitions and practice missiles (projectiles). The missile according to the invention is characterised in that it comprises a body (2) formed by the assembly of several sectors (3) and a case (5) having a housing (6) intended to receive the various sectors, the sectors (3) being produced from a plastic, the missile including means which hold the assembly of sectors (3) together during the handling phases, means designed so as to release the sectors as the missile leaves the tube of a weapon when fired. Application to medium-calibre practice munitions. <IMAGE>
