## Abstract (en)

[origin: WO9315700A1] The present invention relates to an absorbent disposable article, such as a sanitary napkin, a panty protector of a diaper. According to the invention, the article is comprised of at least two generally flat, flexible bodies (1, 2) which include absorbent material and which in a packaging state can lie against one another with first flat sides which are intended to face towards the wearer when the article is used. Two neighbouring bodies (1, 2) of the article are mutually joined along a first common edge (3) which forms a folding line around which the bodies can be folded out from their packaging state and which includes an arcuate section (5) which in the packaging state of the article is convex when seen in a direction from the first common edge (3) towards a second opposing edge of the bodies (1, 2).

## Abstract (fr)

La présente invention concerne un article absorbant jetable, tel qu'une serviette hygiénique, un protège-slip ou une couche. Cet article est constitué d'au moins deux éléments souples (1, 2) généralement plats qui comportent un matériau absorbant et qui, lors du conditionnement, peuvent reposer l'un contre l'autre par des premiers côtés plats qui sont destinés à être orientés vers l'utilisateur ou utilisatrice lorsque l'article est utilisé. Deux éléments voisins (1, 2) de l'article sont joints l'un à l'autre le long d'un premier bord commun (3) qui forme une ligne de pliage autour de laquelle lesdits éléments peuvent être dépliés à la sortie de leur emballage, et qui comporte une section arquée (5), laquelle, lors du conditionnement de l'article, est convexe, vue dans un sens allant du premier bord commun (3) vers un deuxième bord opposé des éléments (1, 2).
