Abstract (en)

[origin: WO9315883A1] The invention concerns an electric razor with a foil and a shaver head which works in conjunction with the foil and which is driven by an optionally electronically timed motor. Fitted to the razor is a display (4) which is connected to an operating-time measurement device (2) and/or a device for measuring the load on the foil and an evaluation circuit. This improves the operational safety of the razor.
