Abstract (en)

[origin: EP0627366A1] Pack of sheets, in particular for packaging. Pack of sheets including a gripping means permitting automated manufacture of standardised packs. The pack comprises a set of sheets cut beforehand to the desired format, these being joined together along a first transverse edge (3) and each being provided, in a second transverse edge (4) opposite the first transverse edge, with a gripping means constituted by a fold (5a), the total thickness of the fold of each of the sheets being reduced, in an area (5) adjacent to the second transverse edge, of width at least equal to the width of the fold, having a value of between 20 and 40% compared to the initial thickness of the fold. Application to packs of packaging sheets for food products. <IMAGE>
