Abstract (en)
[origin: EP0628676A1] An inner window reveal (3), in particular for a flat roof window (2), consists partly of chromium-nickel sheet steel which is polished to a high lustre. It consequently exhibits reflective surfaces (30), on which diffuse and direct sunlight is reflected to the maximum extent. There is thus a greater amount of light in the attic room (D), and the room has better light. <IMAGE>
