Abstract (en)
[origin: EP0628780A1] The present invention relates to an aiming system for an aircraft, particularly a rotary wing aircraft, such as a helicopter. According to the invention, the aiming system comprises the combination of a first individual observation device (9), installed on the side of the aircraft (1), and a second individual axial firing device (10) installed at the front of the aircraft (1), the said first and second devices (9, 10) being connected to the on-board computer (11) of the aircraft (1). <IMAGE>
