Abstract (en)

[origin: EP0628895A1] The present invention relates to a water-resistant timepiece comprising a glass-bezel unit (1, 30) which can be rotated relative to the band (4), in which a seal (10) comprising at least one active portion (11) is arranged between the said glass-bezel unit and the said band (4). An optional fixing means (20) makes it possible to assemble the fixed and revolving units. Moreover, the invention also comprises the seal allowing the production of the said timepiece. <IMAGE>
