Abstract (en)

[origin: EP0629367A2] The invention relates to a storage container having a rear wall and a front wall as well as two side walls in which, at the same height, guide rails are present for receiving and moving further containers arranged in the storage container, at least one of the walls being designed so as to be displaceable or pivotable and including guide rails which, after the displacement or pivoting of the wall, engage, in alignment, in the guide rails of the respectively adjacent walls. The storage container can also be disposed as a longitudinal drawer in a piece of furniture and includes transverse drawers which can be pulled out of the storage container transversely to the pull-out direction. <IMAGE>
