Abstract (en)
The invention relates to an apparatus for projecting/reflecting images, in particular for burial monuments in order to make epitaphs (inscriptions) or other information easier to read. According to the invention the apparatus is characterised in that it consists of a box (2) which darkens the external light (7) and is open at a light inlet aperture (10) which is at least partly closed by a diffuser (6) which filters the external light, and has a light outlet aperture (11) equipped with a reflecting device such as a mirror (1), the image (5) to be projected being located at the inlet aperture. Application to burial monuments, street furniture, advertising media or the like. <IMAGE>
