Abstract (en)
[origin: EP0631033A1] The device for fixing discs in a cutting wheel (2) for tunnel excavators comprises a cutting wheel (2) with recesses (5) through which bearing parts (3) can be pushed together with the discs. The bearing parts (3), which have an eccentric outline relative to the bearing axis (7) of the discs, are fixed in a recess (4) adjoining the axially parallel recess (5), a different position of the discs being obtained according to the rotary position of the bearing parts (3). Wedges (6) are provided for the fixing. <IMAGE>
