Abstract (en)
[origin: EP0631262A1] A selective calling receiver with selectable alerting means has a plurality of alerting means (9-16) for indicating an incoming call, a setting unit (8) for setting at least one of the alerting means to operate in response to an incoming call and a period of time for which the alerting means is to operate, a memory (17) for storing a setting made by the setting unit, and a control unit (6,7) for referring to the setting stored by the memory when an incoming call arrives and operating the alerting device based on the setting. <IMAGE>
