Abstract (en)

[origin: WO9319329A1] A sealing frame for apertures in a wall, in particular the anter wall of a tile stove, comprises a concealed frame (3) to which a removeable panel frame (1) is attached. An opening gate is mounted moveably in the panel frame. The concealed frame (3) consists of two frame components (4, 5) which can be mutually displaced vertically in relation to the plane of the panel frame, and which can be fixed in their respective positions with screws (10). The tiles, or the like, are mounted between the flanges (7, 9) of the frame components (4, 5).
