Abstract (en)

A child resistant closure (CRC) of the type having an inner cap (2) and an outer cap (4), the caps having between them an off-screwing drive mechanism which is strong, reliable and compact. The inner cap (2) is provided with a central projection (18), which may be hexagonal, and which engages a recess (32) in the outer cap, and ribs (20) which extend radially from the central projection on the inner cap. The recess is defined by a number of abutments (30) on the outer cap which also engage the driving ribs. <IMAGE> <IMAGE>
