Abstract (en)

[origin: US5516003A] PCT No. PCT/FR93/00301 Sec. 371 Date Nov. 28, 1994 Sec. 102(e) Date Nov. 28, 1994 PCT Filed Mar. 25, 1993 PCT Pub. No. WO93/20540 PCT Pub. Date Oct. 14, 1993. Vending machine (1) for newspapers, in the form of a cabinet capable of automatically delivering into a receptacle one copy of a newspaper which a purchaser has selected from a plurality of other newspapers and paid for with a payment device incorporated in the vending machine. The cabinet comprises fixed and movable shelves on which the newspapers are stored in various stacks each of a same newspaper. On each of the stacks is provided an individual discharge assembly for the upper newspaper of the stack of newspapers. There are two columns of fixed horizontal shelves (56) secured at each side to two vertical supports (61, 62) welded at their ends to the upper and lower parts of the cabinet and at least one movable shelf for each column. Each discharge assembly for the upper newspaper from a stack of newspapers is displaceable relative to the shelf supporting that stack. There is a guide for guiding the newspaper forming a guide path from the edge of the stack from which it is removed, to the receptacle of the cabinet.
