Abstract (en)
[origin: EP0633350A1] The cable comprises a central core (3) and outer strands (2) formed from at least one layer of wires (21) made of metal, especially steel, which are stranded on a foundation (22) made of synthetic, preferably thermoplastic material, this taking place according to a pitch similar to that of the strands (5, 6) from which is formed the core (3) which can be completely metallic or composite. These cables are intended particularly for use as hoisting cables, especially lift cables, or other multi-cable installations with transmission by adhesion. <IMAGE>
