Abstract (en)
[origin: EP0633356A1] The invention relates to a joint dowel, as a connection for expansion, cutting, movement or day's work joints, in particular for concrete pavings (floors) or concrete surfaces, screeds or flowing screeds, comprising a base element made of round metal, in particular round steel, and a plastics casing, the plastics casing (4) being constructed as a closed unit and in such a way as to be longer in the axial direction and greater in diameter than the base element (3), and the plastics casing (4) having at least one deformable zone (5). <IMAGE>
