Abstract (en)
[origin: EP0633379A2] The invention relates to an espagnolette lock with a reduction gear, with an espagnolette connecting slide actuatable by a locking mechanism and displaceable parallel to the fore-end and with a latch retractable transversely to the fore-end as a result of a reversing lever loadable by a stop assigned to the espagnolette connecting slide. So that the latch can be matched in an optimum manner to different conditions of installation, provision is made for the advancing position of the latch (7) to be adjustable as a result of an adjustability of the play of movement of the reversing lever (30). <IMAGE>
