Abstract (en)

The invention relates to an invisible support for fixing shelves to walls, comprising at least one horizontal element (2) insertable in a cavity (3) in a shelf (1), vertically constraining it to the support (6). The support (6) comprises at least one rawl (4), which can be hidden in the cavity (3) and which interacts between the horizontal element (2) and at least one wall (5) of the cavity (3) in such a way as to permit of free horizontal movement of the shelf (1) with respect to the support (6) only during a nearing operation, while preventing such movement in a retrograde direction. <IMAGE>
