Abstract (en)

The system contains closed-loop control for deriving controlled values from parameters which influence the productivity of the spinning machine (RS). In addition to parameters which are measured by sensors, the system also takes into account for the closed-loop control those parameters which cannot be measured or can only be measured with difficulty. The latter parameters are included in the closed-loop control by means of a fuzzy logic unit, for which purpose the closed-loop control has a fuzzy controller (FC). <IMAGE>

Abstract (de)

Das System enthält eine Regelung zur Ableitung von Regelgrößen aus Parametern, welche die Produktivität der Spinnereimaschine (RS) beeinflussen. Neben Parametern, die durch Sensoren gemessen werden, werden auch solche für die Regelung berücksichtigt, die nicht oder nur schwer messbar sind. Die letzteren Parameter sind mittels einer Fuzzy-Logik in die Regelung einbezogen, zu welchem Zweck die Regelung einen Fuzzy-Controller (FC) aufweist. <IMAGE>
