Abstract (en)
[origin: EP0634813A2] In the case of this distribution block having a plurality of conductor connections (2) which are arranged side by side and contain busbar pieces (4), the mutually facing sides of adjacent busbar pieces (4) are provided with plug contact elements (5) which can be plugged into one another in order to make direct contact, for transverse distribution of the electrical power, so that the transverse connector components, such as transverse distribution rails, space sleeves and the like, which have been normal until now are dispensed with. <IMAGE>
