Abstract (en)
[origin: WO9320673A1] A circuit board comprises a carrier board which functions as a base structure to which is attached rigidly at least one electronics components card to form a wafer assembly where edge connectors to the components card are free for access, said card being attached to the carrier board by at least two rigid mechanical connectors for example glued plastic fasteners/screws or bolts, nuts and spacer means to maintain the carrier board and card at a selected separation.
