Abstract (en)

[origin: EP0635453A1] The supporting element comprises a main plate (13), to which two mutually spaced rolling heads (15) are rigidly coupled; the heads are simultaneously actuated by a conventional motor (16) by means of a transmission belt (17); the element also comprises a secondary plate (18), which is detachably coupled to the main plate (13) by means of a vertically adjustable vertical locking and disengagement column (19) which allows to lower or raise the secondary plate (18) with respect to the main plate (13); there are at least two interchangeable secondary plates (18-18a) which are respectively provided with two heating heads (22) and with two pneumatic heads (23) respectively for processing shrink-wrap capsules and for processing metal capsules. <IMAGE>
