Abstract (en)
[origin: US5518118A] A transporting holding device for picture frames (4) or the like, preferably for installation in a transport crate (1), with several, preferably four, frame securing elements (3), further with two lengthwise adjustable guide devices (5) and two crosswise adjustable guide devices (6). The crosswise adjustable guide devices (6) are guided to be adjustable and able to be immobilized on the lengthwise adjustable guide devices (5), and the frame securing elements (3) are guided to be adjustable on the crosswise adjustable guide devices (6). A greater flexibility is created with such a transporting holding device because the frame securing elements (3) are embodied as a corner bracket for supporting a respective corner of the picture frame (4) and/or as a flat side bracket for supporting a respective part of the edge of the picture frame (4).
