Abstract (en)

[origin: EP0636742A2] Fibre materials are modified with a polymer containing at least one primary or secondary amino group and a bifunctional crosslinking agent, preferably a dialdehyde, and optionally dyed with water soluble, anionic dyes, preferably reactive dyes. The dyeing process with fibre materials modified according to the invention can be carried out low-salt or completely without salt and also alkali-free or using only minimal amounts of alkali.
