Abstract (en)  
This is an electronic system which would detect when secured material has been unsecured. The system can comprises: a power source 20 connected to an audio/visual processor 26; an indicator[s] 20,22 also connected to the audio/visual processor; a vacuum sensing system 32 also connected to the audio/visual processor; and a memory device which would trigger only once after the device has been armed, whereby the system would be armed after a vacuum has been formed and the stress sensing system would detect a leak in the vacuum. <IMAGE>
