Abstract (en)
[origin: WO9323306A1] A food container (1) with guarantee seal (9) includes a lid (5) and a tray (2), made of synthetic material, which are joined along peripheral edges (6, 7), and a removable seal (9) which is suitable to prevent the lifting of the lid (5), and which clearly indicates the integrity of the package. The seal (9) consists of a removable portion of the edge of the tray, which is joined to the rest of the tray by thin tabs (13). In the closed position, the edge of the tray (6) perfectly adheres to, and blends with, the edge of the lid (7) so that it has no protrusions or slits. The edge of the lid (7) has a portion (29) which simply rests on the seal (8) to allow its removal by radial outward pulling and can be folded elastically upward to allow to pull the seal (8) in the same direction.
