Abstract (en)

[origin: EP0639844A1] A method and a device for carrying out the method are specified for electrical disconnection (isolation) of an accumulator 2 from an electrical circuit 7 which is connected by connecting leads 5, 6 to the positive and negative terminals 3, 4 of said accumulator, at least one of the connector leads 5, 6 which is connected to the positive and/or negative terminals 3, 4 of the accumulator 2 being broken according to the invention as a result of an impulse (a pulse). <IMAGE>
