Abstract (en)
[origin: WO9323672A1] The invention relates to a gas friction vacuum pump (1) with at least two differently designed pump stages (3, 12; 26; 35), each comprising a rotor section (9, 27, 37) and a housing section (3, 29, 36); in order to be able to adapt the pump to various applications it is proposed to fit various input stages on the high-vacuum side and that the pump stages are releasably secured together.
