Abstract (en)
[origin: WO9420814A1] The technical field of the invention is that of telescoped round-type ammunition cases. The case according to the invention consists of a cylindrical plastic envelope (2) carrying at each end a plastic cap (3a, 3b) fitted with a metal reinforcing means. The invention is characterized in that the reinforcing means integral with the front cap (3a) is a collar (5) which includes a peripheral cylindrical portion (6) and an outer edge (7) and entirely covers the front end (8) of the cap (3a) extending from the envelope. Application in weapons.
