Abstract (en)
[origin: EP0640404A1] The invention relates to a process for producing, on a metal plate, by means of a projecting threaded bolt of said metal plate, a coating-free connection to an attachment part, and the invention also relates to an apparatus for carrying out this process. The object of the present invention is thus to provide a process and a covering cap for carrying out the process, in order to avoid the previous disadvantages of such processes and, in particular, to shorten the assembly time which is necessary. <IMAGE>
