Abstract (en)  
[origin: WO9322944A1] A process for reproducing a design, especially a fabric design comprising an embroidered appliqué element stitched to a base fabric material, comprises the sequential steps of analysing the design to derive data for use as stitch command data by an embroidery machine (10), and as cutting command data by a cutting machine (8), cutting out an appliqué element (18) from a sheet material (26) in accordance with the cutting command data, transferring the cut-out appliqué element (18) to a base material and stitching the appliqué element (18) to the base material in accordance with the stitch command data. The invention provides a far quicker, more accurate and neater embroidered appliqué fabric than prior semi-manual techniques.
