Abstract (en)
[origin: US5562948A] PCT No. PCT/EP94/00316 Sec. 371 Date Nov. 28, 1994 Sec. 102(e) Date Nov. 28, 1994 PCT Filed Feb. 4, 1994 PCT Pub. No. WO94/22597 PCT Pub. Date Oct. 13, 1994A method for the production of an electrically conductive wall of a fabric and a film material which is provided with an insulating coating, and particularly for the production of sheets of fabric which are provided with an insulating coating and have electrically conductive tapes. In particular, in order to have provided a method with which an electrically conductive wall material with an electrically insulating coating can be prepared, for which the danger of the occurrence of brush discharges is effectively reduced, the coating is perforated after the wall material is coated.
