Abstract (en)
[origin: WO9321269A1] The invention relates to opaque polymer compositions and moulded articles having improved scratch resistance wherein the polymer composition comprises a blend of a matrix polymer selected from the group consisting of polypropylene, high density polyethylene and poly-4-methylpenten-1; at least one impact modifier wherein said impact modifier is a copolymer or terpolymer of ethylene and at least one other alpha -olefin or diolefin; at least one opacifier selected from the group consisting of colourants and fillers and combinations thereof; and at least one block copolymer of at least one styrenic monomer and at least one olefinic or diolefinic monomer.
