Abstract (en)

[origin: EP0641532A1] A length adjustable column (37) for chairs, tables or the like has a vertical tube (1) and a length adjustment element (2) arranged therein. For fixture to a base, a sleeve-like cone section (17) is provided, said sleeve-like cone section (17) being provided on its inner surface (22) with at least one recess (20) into which a projection engages. A plurality of such projections (21) spaced apart from one another are provided over the length of the vertical tube (1), so that the cone section (17), formed by half-shells (19) or simply slotted, can be locked at various heights on the vertical tube (1) in the direction of the axis (3). <IMAGE>
