Abstract (en)
[origin: EP0641579A1] The invention is based on a toy figure for a table ball game, in particular for a table football game, which toy figure (1) comprises a disc-like base (3) which is rotationally symmetrical about a base axis and has a base diameter (D1) and a base height (H1), and further comprises a figure (2), the base (3) being delimited on its underside by a planar base undersurface (10) with a diameter (D2) and, on its upper side by a base top surface (7) which is bordered by a base upper edge (8) and on which the figure (2) extending in the direction of the base axis is fitted. In the case of such a toy figure (1), play is improved in that the diameter (D2) of the base under surface (10) is more than 55% and up to virtually 100% of the base diameter (D1). <IMAGE>
