Abstract (en)

[origin: EP0641651A1] A sheet reversing apparatus for a sheet-fed rotary press with a reversing mechanism includes a paper convey cylinder (65), gaps, a reversing mechanism, a paper trailing end holding member, a moving unit, and a pivoting unit. The moving unit performs a moving operation of the paper trailing end holding member (129) which projects or retreats along an arc with respect to the outer surface of the paper convey cylinder (65) in accordance with a pivotal movement of the paper convey cylinder. The pivoting unit performs a pivoting operation of the paper trailing end holding member in accordance with a movement of the paper trailing end holding member. <IMAGE>
