Abstract (en)

[origin: EP0641720A1] The invention relates to a holder (10) for dosing accessories (12, 13) fixable to a bottle (14). This holder (10) includes a front wall (16), a rear wall (18), two side walls (20, 22), an open top end (24) and a bottom end (26), and has a housing (28) adapted to receive, at least partially, a dosing accessory (12, 13) engaged via the said open top end (24). The housing (28) is delimited by the front, rear and side walls which are made in a single piece. The rear wall is capable of being glued to the bottle and, like the side walls, can be deformed elastically for fitting to bottles of different curvature. <IMAGE>
