Abstract (en)
[origin: WO9323485A1] An aqueous, correction fluid that includes a suspending agent, a binding resin, water, and an opacifying pigment. The suspending agent is preferably a gum or hydrocolloid, e.g., xanthan gum, and the composition preferably has a shear-thinning index (n) of from about 0.08 to 0.50. The fluid may be dispensed from a pen as described in the figure or from a container. A dispenser (10) comprises elongated body member (12) and barrel (14). A tubular passage (16) extends through barrel (14) and opens rearwardly into body member (12) for flow of correction fluid from the body member into barrel (14). Within tubular passage (16) a tubular spring retainer (26) is disposed in interfitting engagement with barrel (14).
