Abstract (en)

[origin: WO9324601A1] Clear water-soluble polymer compounds having a mean molecular weight higher than 10⁶ and selected among the polyalkylene oxides, polyacryl amides, polymethacryl amides and the copolymers of acryl amide and/or methacryl amide with unsaturated organic carboxylic acids having 3 to 5 C-atoms are used in water-miscible and water mixed cooling lubricants to reduce mist formation.
