Abstract (en)

Process for the environmentally compatible degradation of chemical compounds which contain one or more heteroatoms X, X denoting F, Cl, Br, I, N, O or S, by cleavage of the C-X carbon-heteroatom bonds, characterized in that the chemical compounds or articles in which the chemical compounds are contained are treated with steam in the presence of an aluminium catalyst at 300-600 DEG C.

Abstract (de)

Verfahren zum umweltgerechten Abbau von chemischen Verbindungen, die ein oder mehrere Heteroatome X, wobei X F, Cl, Br, I, N, O oder S bedeutet, aufweisen durch Spaltung der C-X Kohlenstoff-Heteroatombindungen, dadurch gekennzeichnet, daß die chemischen Verbindungen oder Gegenstände, in denen die chemischen Verbindungen enthalten sind, in Gegenwart eines Aluminiumkatalysators bei 300 - 600 °C mit Wasserdampf behandelt werden.
