Abstract (en)  
[origin: EP0643192A1] The present invention relates to a roller shutter box assembly characterised in that at least the lower rim of one of the end plates (6) is wide enough to mount the fixing and transmission elements (8', 9') of the members (8, 9) for operating the blind part of the said roller shutter, in that the upper section (2) comprises a fixing surface (10) which is at least partly masked by the upper edge (5') of the inner section (5) and in that the lower section (3) comprises a part (12) of a snap-fitting mechanical anchoring device which extends over the entire length of the said section (3) and engages, at the time of mounting, with a complementary part fixed to the lintel of a window in order to mount the said roller shutter box (1). <IMAGE>
