Abstract (en)
The high-frequency transmission cable comprises insulated conductors combined into bundles, themselves being combined into at least one assembly, and an external overall protective jacket. It is characterised in that it furthermore comprises a longitudinally grooved dielectric keeper (former) (5) for combining the bundles of each assembly, the grooves (6) of which are opened via a slit (7) on each of them and hold the individual bundles (1) in place, separating them from each other. Application: Computer cable. <IMAGE>

Abstract (fr)
Le câble de transmission haute fréquence comporte des conducteurs isolés assemblés en faisceaux, eux-mêmes assemblés en au moins un ensemble, et une gaine extérieure de protection globale. Il est caractérisé en ce qu'il comporte en outre un jonc diélectrique (5) rainuré en long d'assemblage des faisceaux de chaque ensemble, dont les rainures (6) sont ouvertes par une fente (7) sur chacune d'elles et maintiennent les faisceaux individuels (1), en les séparant les uns des autres. Application: câble informatique. <IMAGE>
