Abstract (en)

[origin: WO9325104A1] A device for holding up trousers (1), skirts, shorts or similar by attaching this item of clothing to a second item of clothing such as a shirt (2), blouse, top or similar comprises a rigid base piece (3) less than fifteen centimetres in length and having a clip (4) at one end, one leg of said clip being secured to or integral with the base piece (3). The rigid base piece (3) is provided with an attachment means (5) at its end opposite the clip (4), the mobile leg (6) of said clip (4) being oriented, when the clip (4) is closed, towards the above mentioned end fitted with the attachment means (5) in such a way that, when the clip (4) is attached to the edge (12) of the first item of clothing (1), the attachment means (5) at the opposite end can be positioned inside said item of clothing (1), the attachment means (5) being designed for attachment to the second item of clothing (2) lying inside said first item.
